# LOW VOLTAGE EQUIPMENT

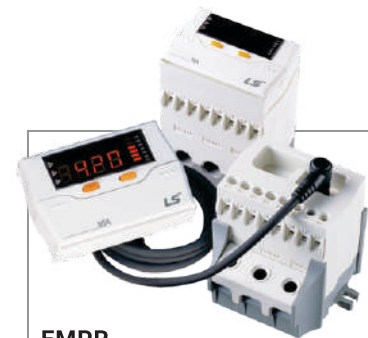

**MPCB**  
**Motor Protection Circuit Breakers**  
Motor protection circuit breakers are a specialized type of electrical protection device that is designed specifically for electric motors

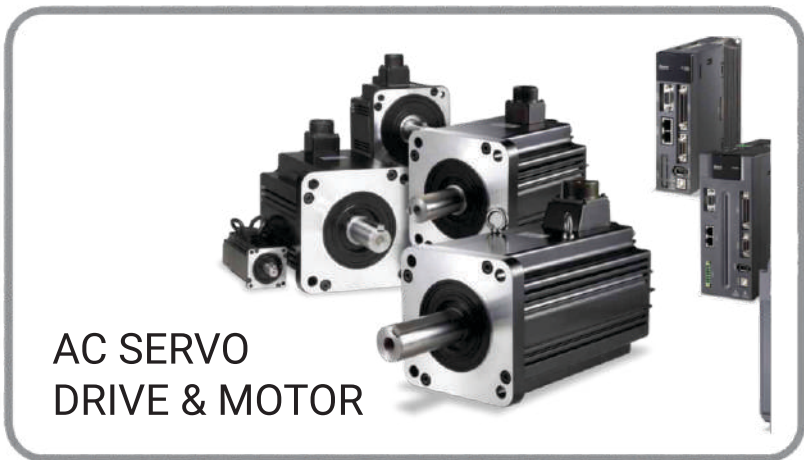

**MCCB**  
**Metasol Molded Case Circuit Breaker**  
Molded Case Circuit Breaker/Earth Leakage Circuit Breaker Same external dimensions as MCCB and ELCB  

- Rated Current: 3~1200A
- Breaking capacity (Icu): 10~85kA

**EMPR**  
**Electronic Motor Protection Relay**  
EMPR is an electronic motor protection relay used to protect low voltage motors by replacing thermal overload relays, also known as electronic overcurrent relays. EMPR is highly reliable by its accuracy and real-time data processing. LEDs on EMPR indicate status of a system
