

# Simplifying Branch Networks

**SD-WAN**  
Own your internet

**Edge Gateways**  
Connect everywhere

**Cloud Management**  
Optimize your network

# Move to the cloud with confidence

## A One-Stop-Solution approach, aiming to create & accelerate digital WAN transformation

An all-in-one solution approach, we provide end-to-end design, deployment, & 24/7 NOC support of SD-WAN customized to your needs. Nexapp Instaroute Managed SD-branch Solution eliminates many of the challenges of Branch Network and Security with Its functionalities includes SD-WAN, routing, network security and Wi-Fi and LAN for distributed organizations, deliver significant benefits in terms of deployment speed, ease of operation and cost savings.

**We consult, design  
and deliver a full  
SD-WAN network  
that best fits to your  
business' needs**

## The best solution for your needs

### Broadband and dedicated services

Broadband from 1MB to 1GB, and Dedicated from 1MB to 10GB.

### Cloud optimization

Optimized traffic to Cloud and SaaS applications.

### BYO connectivity

## Network as a Service

# Simple, Optimized, and Secure

- ✓ Connectivity
- ✓ Design
- ✓ Consultancy
- ✓ Deployment
- ✓ Field services
- ✓ Day-to-day management

# Software Defined Branch - Network as a Service

SD-Branch uses SD-WAN technology bundled with WAN EDGE routers to transform and simplify branch networks. It allows multiple branches to be connected over wired and wireless WAN, making management and operations simple, reliable secure and cost-effective.

Cloud  
Unified Orchestrator

WAN EDGE  
Routers & Gateway

Transport  
Connectivity

Advanced Firewall

Access Control

Authentication

Encryption

# Security at Edge

Centrally orchestrate security elements through Unified Controller

## Converged Managed Services

helps enterprises meet their technical and commercial requirements. Increasing agility and reducing cost and complexity. This service helps reduce downtime, simplify management and increase network capacity.

Do It Yourself (DIY)

Nexapp Fully Managed

Co - Managed WAN Deployment

24x7 Hands On Support

Proactive Monitoring & SLA

Reporting & Analytics

Managed Broadband and 4G LTE

Feasibility, Provisioning & Testing

Services Outages Analytics & Reporting

# SOFTWARE DEFINED WAN

## INSTAROUTE™

Scalable Day One Deployment

Centralized Management

Zero Touch Provisioning

Next Gen Firewall

Advance Analytics

Multi WAN Support

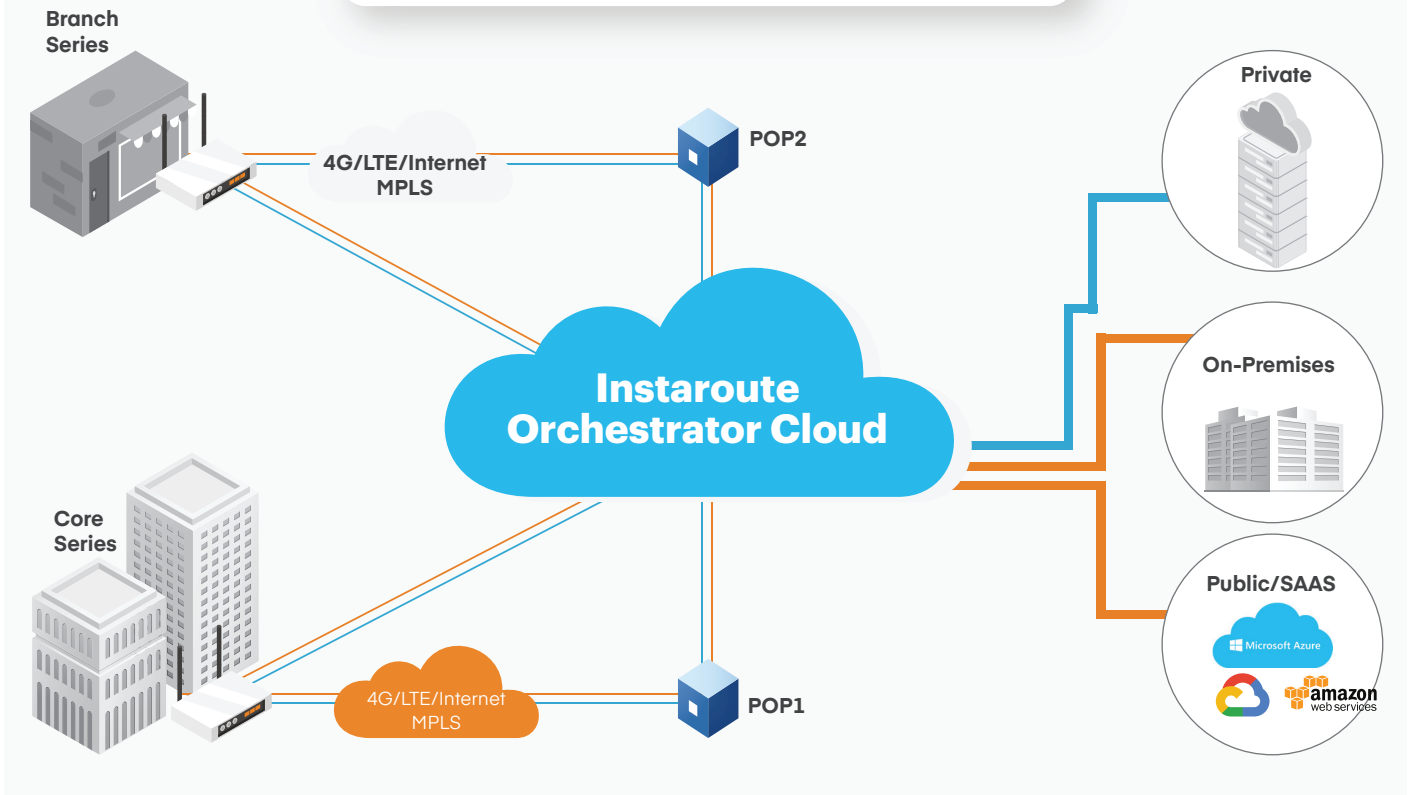

## WAN EDGE Routers and Cloud Gateway

Core series appliances available in Physical & Virtual (AWS) form factor , enterprise-class ruggedized wireless endpoint gateways and modems for branch offices

# Why SD-WAN with Nexapp

	Nexapp Instaroute	MPLS	Global Carriers	SD-WAN Vendors
<p><b>Cost Effective &amp; Scalability</b></p> <p>As businesses grow &amp; move to the cloud, the need for more bandwidth increases. Scale up your bandwidth requirement, cost-effectively with SD-WAN.</p>	✓	✗	✓	✓
<p><b>Internet Anywhere</b></p> <p>Broadband or 4G LTE services can be easily configured anywhere in India as per the best available ISP to support SD-WAN, backup or diversity requirements.</p>	✓	✗	✗	✗
<p><b>Prioritize &amp; Optimize</b></p> <p>Prioritize data between critical and non-critical traffic, along with optimizing application performance across sites.</p>	✓	✗	✓	✓
<p><b>Managed Service</b></p> <p>Get complete control of your network's end-to-end services, including provisioning, designing, deploying, and supporting SD-WAN.</p>	✓	✓	✓	✗
<p><b>Options</b></p> <p>Easily connect existing networks and manually select every component of your SD-WAN, from carriers to providers and internet access technologies.</p>	✓	✗	✗	✗
<p><b>The Hardware Supports</b></p> <p>Supports 4G/LTE connectivity as well is as read for the 5G wave.</p>	✓	✗	✗	✗
<p><b>IoT Protocols Support</b></p> <p>MQTT, MODBUS &amp; Serial Port ( RS232, RS485 )</p>	✓	✗	✗	✗
