About Us?

We Specialize in

- ✓ Implementation of computer integrated manufacturing technology in medium and large scale industries. We are focused towards increasing customer's productivity, improve product quality and effective utilization the human resource.
- ✓ Our specialized expertise includes spot welding, arc welding, material handling, and machine tending. We also specialize in assembly robotic systems and other innovative robotic solutions for industries with leading industrial standards. All of this is supported by an agile manufacturing infrastructure.

Why choose us

- ✓ We have a strong committed technical team focused to deliver the innovative automation solutions with over 80 years of cumulative experience in the field of Robotics & Automation.

Our Experience

- ✓ Over the years, we have experience of successful installation, integration and programming of about 500+ robots and about 200+ robotic cells in various sectors.
- ✓ Hands on experience in the field of Automotive, Aerospace, Reinforced plastic, Machine tool, Pharmaceutical, Foundry and Forging and packaging Industries.

Our Service

Berht's exhaustive customer list includes, Automotive OEMs, Automotive line builder companies, Robot Manufacturers, Machine tool manufacturers, Tier-1 and Tier-2 manufacturing companies, structural steel manufacturers, Pharmaceutical companies, and many other manufacturing industries.

Berht provides solutions to the following industry segments and application areas:

- Automotive
- Pharmaceuticals
- Infrastructure
- Foundry and Forging
- Aerospace
- Packaging
- Reinforced Plastic
- Machine Tool

Services we Provide

Robot system solutions for

Manufacturing sector

- BIW
- Foundry and casting
- Machine tending
- Deburring and polishing
- General welding applications

Process Industries

- Material handling
- Process related activities

PLC programming - onsite / online

Robotic programming

- Process study for improving cycle time
- Capacity optimization and model addition
- Robot simulation

Retrofitting of robotic cell

Automation Services

Berht offers engineering services to enable customers and integrators to implement industrial robot-based automation systems.

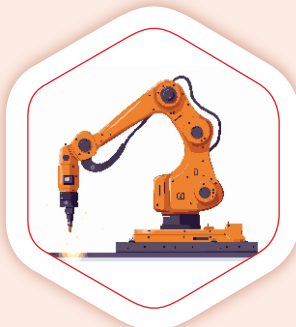

Robot Systems

Berht Robotics offers turnkey robot-based automation systems for a wide range of industries and application areas.

Welding

Body in White Lines - Welding jigs for panels on sub assembly and main assembly, Welding solutions for the steel and metal industry, Specialized welding like - Laser, Plasma etc.

Foundry and Casting

Automated systems for High Pressure Die Casting extraction.

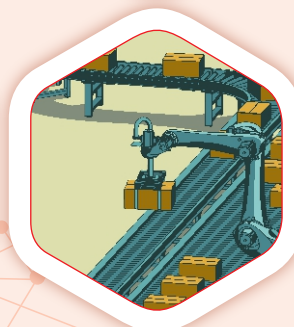

Machine Tending Solutions

Robot Automated Machine tending Solutions for CNC machines.

Material Handling Applications

CNC Machine loading-unloading solutions - Cells and Lines, Pick and place systems (food, pharmaceutical, consumer goods), Palletizing/de-palletizing systems, Automated Fastening.

With a diverse portfolio, **Berht** has footprints in over **8** countries

- 1. India
- 2. Bahrain
- 3. Saudi Arabia
- 4. Frankfurt (Germany)
- 5. New Jersey (USA)
- 6. Indiana (USA)
- 7. Ohio (USA)
- 8. Monterrey (Mexico)

Our customers across the globe
